## Number Fun ☺

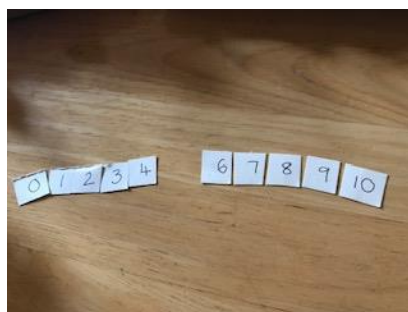

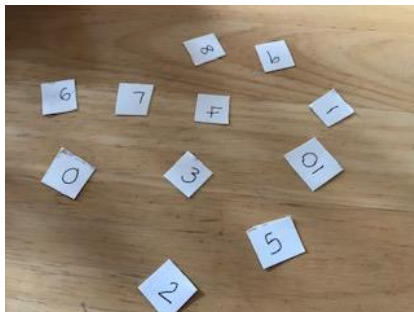

Today we're going to have some fun with counting and numbers.

You can make little number cards out of recycled card.

This works differently from your number line because you can mix them all up and put them back in the right order and you can take numbers away and play "What's The Missing Number?"

If you've been collecting things when out walking or if you have recycled materials at home you could make up little number games. This is an egg box that can hold up to 10 items.

Put in different amounts and match the numbers to the amount. Can you say the amount just by looking, without counting? That's called subitising.

If you want to explore numbers further you could try making 10 in different ways

5 pine cones and 5 stones make 10 altogether. Can you find other ways of making 10?  
You could make up little calculations of your own.

If you want to listen to a song about really big numbers click here. You'll be amazed!

Here is number song that we play at nursery. Why not try it at home?
