

## My WoW on the Move exhibits

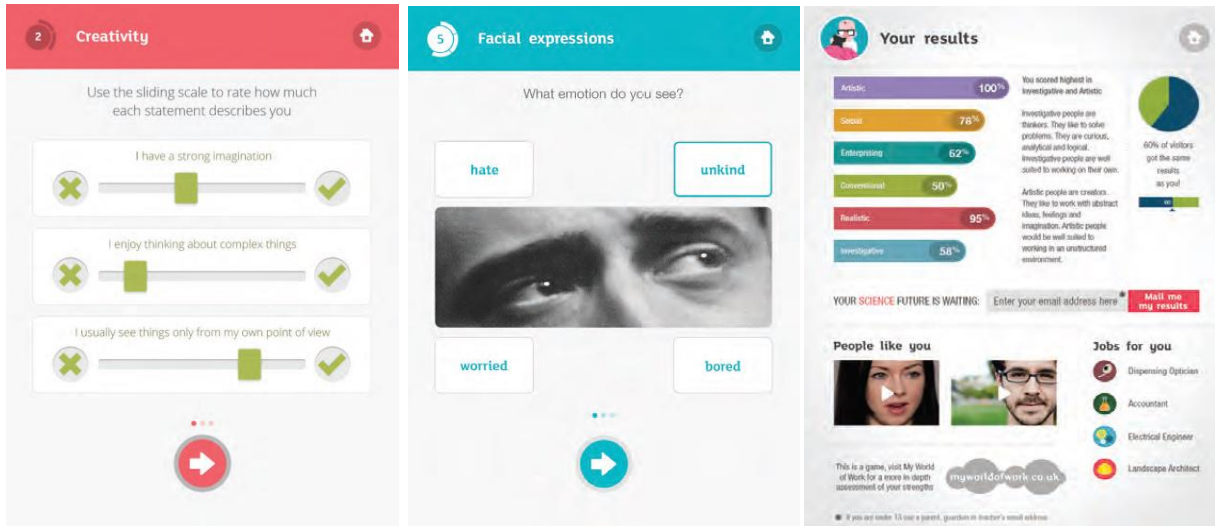

The mobile exhibition consists of a 70 inch touch screen info wall, a virtual dressing up mirror and 32 iPads in a rechargeable case, which are designed to support the development of CMS, particularly horizons, and raise awareness of careers in Science, Technology, Engineering and Maths (STEM).

**The large interactive touch screen** provides a wealth of information from My WoW on careers in STEM.

The iPad personality quiz consists of a series of games and quiz-style questions designed to challenge and entertain, allowing visitors to explore their personalities in relation to careers using the iPads provided. Once the quiz has been completed users can send their personalised results to their email address.

The MyWoW magic mirror is a virtual dressing room that allows visitors to try a job on for size, as they get the chance to see what they'd look like in a variety of outfits, helping them to picture their future in a fun and exciting way.
