

Are you up for the 'Learning Provocateurs' Challenge?

"Through their natural curiosity and by providing them with a wide variety of activities and experiences in play, children begin to develop a range of skills and concepts including observation, experimentation and free exploration of their surroundings."

Alice Sharp – Experiential Learning, Learning Provocateurs, 2017

'Interesting items promote curiosity and wonder in young children'

'Interesting items can draw children in. They will use them in imaginative ways, often creating their own stories which develops language, literacy and communication skills'

'When we allow children to direct their own play by offering open-ended, meaningful resources to explore, we can expect awe and wonder'

'The **CID** Approach
 If I am **curious** I will investigate.
 When I **investigate** I make discoveries.
 My **discoveries** help me learn!'

'Find a way to catch a child's imagination, to create a new 'world' which excites all involved'

So, what's the challenge?

We are asking you to carry out the 'Learning Provocations Challenge' with your child over the Easter break. We want you to find curiosity provoking objects of interest similar to the pictures above. We will then use these objects within the nursery to promote a curiosity provoking learning environment.

This is a great opportunity to work with your child and you'll be helping increase our resource bank too! What's not to love 😊

Speak to Donna if you want more information.

We can cover costs to a maximum of £10.00 which you can claim back following completion of the challenge by handing in receipts.
