

THE KIRKHILL GARDENING CLUB

A gardening club has been created to help maintain the Science Garden and we are working with the school to get the children involved in gardening and outdoor projects over the next year, teaching the children about our great outdoors.

We are getting together on Saturday 21 September for some general weeding and tidying up which is much needed after the summer break. All are welcome, including the children. Please bring along your tools, banter and smiles.

Going forward there will be a regular meet up. If you would like to be part of our gardening club, please get in touch with
Emma Love on 07958 620263
