### Parents/Carers of P5.17 and P5.18 pupils

Dear Parent/Carer

#### BIKEABILITY LEVEL 1 TRAINING

Primary 5 are about to start their Bikeability Level 1 training. The training will take place during school hours and will commence on Monday 12 May 2014.

The Primary 5 training is delivered by class teachers and is concerned with maintenance and safety, as well as some of the basic skills and understanding needed to ride a bike. This is an excellent programme which helps prepare the pupils for Bikeability Level 2 which is carried out in Primary 6. If your child has a bicycle and helmet and you are happy for them to bring it to school this would be most helpful. Please note that a helmet **must** be worn in order to take part.

We have bicycle rails situated in various places around the school which can be used to padlock bikes, if your child brings a suitable lock. Class teachers will allocate the space their class must use.

It will be the responsibility of parents/carers to ensure that your child and his/her bicycle get safely to and from school whilst participating in the scheme.

Yours sincerely
