INTRODUCTION

Dear Pupil

Making the right course choices in S5 and S6 is a very important part of your educational progress. The choices that you make at these times are crucial to your educational future and your possible career thereafter. It is vitally important therefore that you take the option choice process seriously and that you give it your full attention and commitment.

It is important that your course choices are based on full and accurate information. This document is a starting point and contains details of each of the courses on offer. You should read it carefully; noting also that the most up to date subject information can be found on the SQA website: www.sqa.org.uk.

You should also discuss your course choices with your family and friends as this will give you every opportunity to think through your decisions. You will of course receive advice and support from staff in the school. You will have a formal meeting with your Pupil Support Teacher but you should also take the opportunity to talk to your teachers about your subject choices. In addition you will be able to access careers advice should you require it.

The forthcoming course choices are vitally important to your future, think carefully before you make any decisions and remember if you have any concerns ask for advice.

Mr. S. Clark

Head Teacher

This is an important stage in secondary school. At the end of S4, you are faced with a number of possible choices:

- Stay on for a fifth year

OR

- Stay on until Christmas of fifth year if you have not reached school leaving age by the end of fourth year*

OR

- Take up full-time employment/training

OR

- Apply for a college course – Further Education

If you are considering leaving school, it is crucial that you have an interview with the Careers Adviser. You should also be discussing your plans with your Pupil Support Teacher and researching your personal areas of interest. A useful website is www.myworldofwork.co.uk

All students entering fifth year must:

- Choose English at the appropriate level
- Choose four other subjects that they are currently studying in S4 (as far as possible)
- Have a full 33 period timetable.

*Official school leaving dates are as follows: You may leave at the end of May 2022 if you will reach the age of sixteen on or before 30th September 2022.

You may leave at Christmas if you will reach the age of sixteen between 1st October 2022 and 28th February 2023.

Pupils planning to return for a sixth year will be required to choose at least **four** curricular subjects if they have not secured five passes in S5. Other pupils will be required to choose **at least** three curricular subjects **and** participate in the Community Involvement Programme or the extensive Vocational Programme. These activities will be agreed with S6 pupils in June/August 2022. Again, pupils should be discussing their plans with their Pupil Support Teacher and carrying out research into their post school destinations.

In Sixth Year, students are expected to take greater responsibility for their learning and use their non-class time profitably. Making the best use of this time can be quite complex and involves careful advance planning and disciplined working. If you think you will find managing your subjects difficult, ask your Pupil Support Teacher for help.

Our pupils have access to a high quality, varied vocational programme. For many pupils this enriches their curriculum in S6 and for some pupils it is also an appropriate choice for S5.

Higher Education

Universities are keen to encourage applicants to pursue their studies to a more advanced level in Sixth Year. Students who meet or exceed the minimum university entrance requirements after Fifth Year are recommended to study at least one (and preferably more) subject at Advanced Higher level.

However, it is not always advisable for students who have not met the minimum university entrance requirements to take Advanced Highers. The universities will continue to look for breadth of study across four or more subjects; it is, therefore, vital to select more Highers in these circumstances. For example, if a course has a minimum entrance requirement of BBBB and a student achieves AACC or BBCC at Higher, taking two Advanced Highers in the subjects in which the As or Bs have been gained will not help the applicant reach the minimum requirement. Pupils should instead concentrate on improving their qualifications across the broad range of subjects, as opposed to specialising in the areas in which they have already performed well.

NB: If you are considering applying to university, particularly for courses such as Medicine, Veterinary Medicine, Dentistry, Physiotherapy and Pharmacy you are advised to consult the university website and/or telephone the admissions officer, as the entrance requirements can change from year to year, however, studying at Advanced Higher will be compulsory.

Choosing Subjects

When pupils chose their subjects at the end of second year, they were advised to maintain breadth across subject groups. This time, pupils should be thinking more selectively about which subjects to take.

Consideration should be given to the following factors:

- Choose subjects that are essential for your chosen career area/ university or college course
- Choose the subjects that you are most likely to pass at the next level and with the highest grade
- Choose subjects that you enjoy
- Keep a balanced range of subjects if you are still unsure of a career area

In S4 pupils studied eight subjects, whereas in S5 you will be studying five. Pupils should research entry requirements for Higher Education, Further Education, training courses or careers as appropriate. The subjects they select for next year should reflect these requirements.

Each subject overview states 'Pupil Eligibility'. This is the suggested entry requirement for that subject and pupils should be aware of this information when making their choices. This is particularly important for pupils considering taking a 'crash' Higher. This should only be considered in S6 where there is a degree of flexibility in the timetable to allow for additional independent study in the new subject area.

Pupils and parents should note, however, that whilst we offer a broad range of courses both within school and through the Vocational Programme; if there are not sufficient numbers of pupils choosing a subject, the course may not run.

Where Can You Get Additional Advice When Choosing Subjects?

Pupil Support

Your Pupil Support Teacher will be able to advise you about the balance of the subjects you are considering, and their appropriateness in the light of your progress, over the past two years and any career ideas you may already have.

Subject Teacher

The teachers of the subjects you are studying now will be able to tell you whether you have a realistic chance of success if you take that subject to a more advanced level. Ask them!

If you are thinking of starting a new subject be sure you really understand what will be involved - how much practical work, how much written work, how much homework - the best person to ask is the Principal Teacher of that department, but always check the 'Pupil Eligibility' in the first instance.

Careers Interviews

Pupils are able to access individual support from our SDS (Skills Development Scotland) Careers Adviser. However it is important that all pupils take responsibility to do initial personal research on the SDS website My World of Work (www.myworldofwork.co.uk). All pupils should register on the website as a way to inform and support their future plans then ask for an interview via their Pupil Support teacher or arrange an appointment directly with the careers advisor.

Other sources

The main source of information on Further and Higher Education courses now is the database www.planitplus.net. This provides details of courses in schools and colleges, as well as full documentation on courses available at Universities and Colleges. Access to this facility is via any computer at home or in school. Young people leaving school who have not been able to find suitable work, training or a place at college should register with their local Skills Development Scotland Centre where they can access help and support in their job search.

School Website and Twitter feed

Pupils can access part time and full time vacancies and information about Colleges, Universities, Apprenticeships and employment opportunities through the Careers page on the school website and on Twitter.

Vocational Programme

East Renfrewshire Council has developed a very successful vocational programme providing young people with the opportunity to achieve qualifications and a progression route that fits them best, which will serve their interests, talents and ambition.

Pupils interested in vocational options should see their Pupil Support teachers to find out more about the Vocational Programme. This will not commit pupils to a course but will give them, and their parents, the opportunity to consider the courses available so they may make a relevant and appropriate choice.

Foundation Apprenticeships

Foundation Apprenticeships are a work-based learning opportunity for high school pupils in S5/6. Pupils will spend time out of school at college or with a local employer, and complete the Foundation Apprenticeship alongside their other subjects. The qualification has a one and two year model and is linked to one of six key sectors of the Scottish economy, so young people are getting industry experience which will help them kick-start a successful career in their chosen field.

You may wish to source a work placement yourself. This would need to be health and safety checked by Gateway Service. Pupils should note that this course may cut across other school-based learning and they will be expected to catch up in other study periods.

Pupils interested in Foundation Apprenticeships can obtain more information from their Pupil Support Teacher.
