

Isolation guidance / Home Learning Information

We are aware with the newly changed guidance on COVID it has been a challenge for everyone to get our head around these new procedures. We have therefore provided some bullet points below to try and help with this.

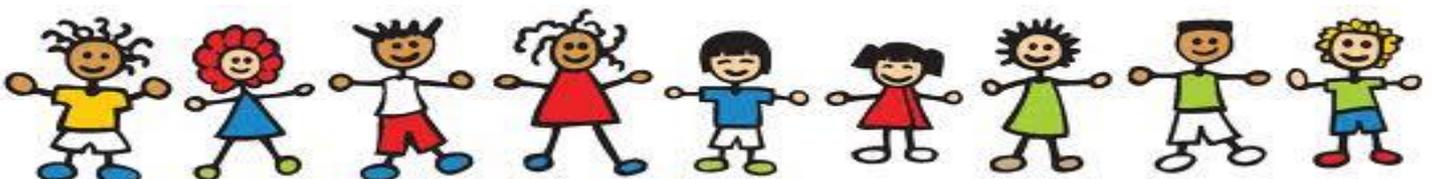

Where a member of a household **develops any of the main symptoms** (persistent cough, loss of taste or smell and a fever) or **has a positive lateral flow test** it is essential that ALL members of the household isolate as close contacts and take the following steps.

- The individual who is symptomatic *or* has a positive lateral flow test should isolate and get a PCR test as soon as possible.
- In the result of a negative PCR test, all members of the household can end their isolation.
- In the result of a positive PCR test, the other members of the household, being considered close contacts, should follow the guidance as below:
 - Each close contact should book a PCR test and, if positive result is given, follow self-isolation guidance as given by NHS Track and Trace
 - If a negative PCR test is given, individuals can end isolation when either under 18 or when doubly vaccinated. If you are over 18 and not fully vaccinated please follow self-isolation guidance.
- If your child is required to self-isolate due to a positive PCR result or has been advised by NHS track and trace to do so, you are required to send a copy of the NHS email/text to schoolmail@netherlee.e-renfrew.sch.uk . Please include your child's return to school date too.
- Once this has been received, teachers are notified that your child will be isolating and they will prepare remote, home learning tasks for them to access via Google Classroom unless you have advised them not to due to your child feeling unwell as per Mrs Donaldson's email.

If you have any questions or require further information on the above please don't hesitate to get in contact through the usual methods.

Kind regard,

Netherlee Office Team
