

Puzzle of the month

A census taker approaches a house and asks the woman who answers the door "How many children do you have, and what are their ages?"

Woman: "I have three children, the product of their ages is 36, and the sum of their ages is equal to the address of the house next door."

The census taker goes next door, comes back and says, "I need more information." The woman replies "I have to go; my oldest child is sleeping upstairs." The Census taker says "Thank you, I now have everything I need."

Closing Date: Friday 1st March
