Educational Trust

MISSION
DISCOVERY

This summer Renfrewshire pupils will have the chance to work with NASA astronauts, astronaut trainers, scientists and leaders.

The International Space School Educational Trust is bringing Mission Discovery to Scotland once again, and during a five day mission pupils can learn:

- NASA leadership, team building and personal development skills
- about biomedical research
- how space exploration benefits life on earth
- what the space environment feels like (from those who know)
- about scientific research, experiments and innovation—on earth and in space

Working in teams, participants will develop their idea for an experiment that can be carried out in space. Winners could be sending their experiment out of this world to be conducted on the International Space Station.

This is a unique opportunity that will allow you to develop key life skills, confidence and a broader understanding of career pathways. It could also enhance your c.v. and profile.

Mission Discovery is free to Renfrewshire's pupils. There are 138 places available for pupils moving into S4. If more people than that apply, a random selection process will be applied.

Mission Discovery will take place at the University of the West of Scotland for five full days: Monday 5–Friday 9 June 2017.

Please apply to:
www.renfrewshire.gov.uk/MD2017

Closing date for applications is:
Friday 5 May 2017.
