

Energy Forever

Home Learning Exercise 2: From Fossil to Re-

The picture on the right shows a fossil fuel power station.

1. What does the term fossil fuel mean?
2. Give two reasons why fossil fuel power plants are bad for the environment.
3. Give the different energy changes that takes place in a coal power plant.
4. Renewable energy is now being used as well as fossil fuels. What does the term renewable mean?
5. Write down as many forms of renewable energy as you can.
