

# Energy Forever

## Home Learning Exercise 5: Future of Renewable Energy

1. Using your knowledge of this topic, write a few sentences explaining whether you think renewable energy is a good thing or a bad thing.
2. One person is planning to put solar panels on the roof of his house in the highlands, is this a good or bad idea? Could you suggest an alternative form of energy?
3. Choose one of the renewable fuels that you have studied and give some disadvantages of using it.
4. Can you imagine any other way that we could generate energy to use in our homes? Write a few sentences explaining your idea, a diagram can also be used.
