STEAM IN ST. LUKE'S

S2 Digital Design day

Back for a fourth year in a row. The annual S2 Digital Design day hosted by the faculty of Business, Technology and ICT saw our S2 pupils work in teams to create a mobile app that solves a unique problem. This year the event was supported by local University lecturers and professors as the faculty looks to build stronger links with FE and HE establishments to support the learning and teaching for our young people.

Young Scot baby box competition

Congratulations to Emily Wilson, S4, who successfully made it through to the co-design workshop stage of the baby box competition set by the Scottish Government and Young Scot. The session took place in Edinburgh on 17th October, and was a great achievement and opportunity for her to meet and work with graphic designers.

D&T take on Dundee's civil engineering rejuvenation project

A number of S6 pupils have been working on the civil engineering design competition inspired to capitalise on Dundee's rejuvenation. Mrs Goldie has been working with three S6 pupils to put together a proposal to design an attractive and functional theme park. The three pupils Mia Millar, Holly McPaul and Rachel McKane are drawing up a number of proposals for the competition which closes in December. The pupils hope to share their project ideas with the rest of the school before they send it off.
