S5/S6 COURSE CHOICE

Making the right course choices in S5 and S6 is a very important part of your educational development. The choices that you make at these times are crucial to your educational future and your possible career thereafter. It is vitally important, therefore, that you take the option choice process seriously and that you give it your full attention and commitment.

It is important that your course choices are based on full and accurate information. This document is a starting point and contains details of each of the courses on offer. You should read it carefully. You should also discuss your course choices with your family and friends as this will give you every opportunity to think through your decisions.

You will, of course, receive advice and support from staff in the school. You will have a formal options interview with your pupil support teacher; however, by this point you should more or less know what subjects you are planning to take. If you are unsure, you should speak to your pupil support teacher and/or your subject teachers prior to your options interview. In addition to this, you can request a careers appointment through your pupil support teacher. It is essential that those of you who are considering further study at college or university check carefully which subjects are essential for your preferred courses. You will find this information by checking the prospectus or website of the college or university concerned. Again, speak to your pupil support teacher if you need help.

The forthcoming course choices are vitally important to your future. Think carefully before you make any decisions and remember to seek advice if you are unsure.

S5/S6 COURSE CHOICE

This is an important stage in secondary school. At the end of fourth year, you are faced with a number of possible choices:

- Stay on for a fifth year

OR

- Stay on until Christmas of fifth year if you have not reached school leaving age by the end of fourth year*

OR

- Take up full-time employment/training

OR

- Apply for a college course – Further Education

If you are considering leaving school, it is crucial that you have an interview with the Careers Officer. You should also be discussing your plans with your pupil support teacher and using the internet to research career areas.

A useful website is www.myworldofwork.co.uk

The Careers Library within the school also contains information on careers, modern apprenticeships and other relevant pathways.

If your choice is to continue at school, you should still be making use of the Careers Library to help you select appropriate subjects to study next year.

All students entering fifth year must:

- Choose English at the appropriate level;
- Choose four other subjects that they are currently studying in S4 at the appropriate next level;
- Have a full 33 period timetable.

*Official school leaving dates are as follows:

You may leave at the end of May 2020 if you will reach the age of sixteen on or before 30th September 2020.

You may leave at Christmas if you will reach the age of sixteen between 1st October 2020 and 28th February 2021.

CHOOSING SUBJECTS

When you were choosing your subjects at the end of second year, you were advised to keep a balanced set of subjects and not to cut out any subjects which might be important later on. This time, you should be thinking more selectively about which subjects to take.

You should take the following factors into account:

- Choose subjects that are essential for your chosen career area / university or college course
- Choose the subjects that you are most likely to pass at the next level and at the highest grade
- Choose subjects that you enjoy
- Keep a balanced range of subjects if you are still unsure of a career area

The correct choice of subject is vitally important. In S4 you studied eight or nine subjects, whereas in S5 you will be studying 5 subjects.

You must choose a sensible set of subjects, especially if you intend to go on to Higher or Further Education. To ensure progression you must choose the correct LEVEL to study in each subject. The 5 subjects will be chosen from the eight or nine subjects that you are currently studying. (NB this can include PE and RMPS).

You should by now have some idea of the kind of Higher Education, Further Education, training course or career for which you are aiming and you should be aware of any subjects that you require to study in order to achieve that aim. It may be difficult for students to decide which other subjects to choose. You should speak to your class teachers, Pupil Support teacher and your parents who can all advise you of your realistic prospects in your proposed course.

If you are considering applying to university, particularly for courses such as Medicine, Veterinary Medicine, Dentistry, Physiotherapy and Pharmacy you are advised to consult the university website and/or telephone the admissions officer, as the entrance requirements can change from year to year.

S5/S6 COURSE CHOICE

At the end of fifth year, you are faced with a number of possible choices:

- Stay on for a sixth year
- Apply to Higher Education
- Apply to Further Education (you should be applying for this now)
- Take up full-time employment/training

If you are considering leaving school, it is crucial that you have An Interview with the Careers Officer. You should also be discussing your plans with your pupil support teacher and using the internet to research career areas.

A useful website is www.planitplus.net. It is your future – ensure you make a sensible and informed choice.

All students entering sixth year:

- should choose at least 4 subject options;
- have the opportunity to take judiciously chosen "crash" subjects;
- can attend work experience placements as part of their timetable;
- can attend additional college placements;
- can volunteer as a Peer Tutor.

In sixth year, students are expected to take greater responsibility.

For their learning and use their non-class time profitably.

Making the best use of this time can be quite complex and involves careful advance planning and disciplined working.

If you find this difficult, ask your pupil support teacher for help.

HIGHER EDUCATION

Universities are keen to encourage applicants to pursue their studies to a more advanced level in Sixth Year. Students who meet or exceed the minimum university entrance requirements after Fifth Year are recommended to study at least one (and preferably more) subject at Advanced Higher level.

However, it is not always advisable for students who have not met the minimum university entrance requirements to take Advanced Highers. The universities will continue to look for breadth of study across four or more subjects; it is, therefore, vital to select more Highers in these circumstances. For example, if a course has a minimum entrance requirement of BBBB and a student achieves AACC or BBCC at Higher, taking two Advanced Highers in the subjects in which the As or Bs have been gained will not help the applicant reach the minimum requirement.

Pupils should instead concentrate on improving their qualifications across the broad range of subjects, as opposed to specialising in the areas in which they have already performed well.

Students should note that for certain courses, such as Veterinary Medicine, Advanced Highers are compulsory. Please consult the appropriate university website for more information.

“CRASH SUBJECTS”

Only students in S6 can take a “crash” Higher - i.e. in a subject that they have not previously studied to National 5 level. Advice should be sought from the relevant subject principal teacher and also from your pupil support teacher as this is not an easy option. Similarly, students may choose to “crash” at National 5 level.

CAREER CHOICE

Students planning to take up full-time employment or training after sixth year should take advice from their pupil support teacher and from the Careers Officer on appropriate subject choice. There are a variety of vocational options within the vocational programme which may be of relevance and interest. Students can take a combination of school based courses and college based courses.

PUPIL SUPPORT

Your Pupil Support teacher will be able to advise you about the balance of subjects you are considering, and their appropriateness in the light of your progress over the past few years and in the context of any career interests you may already have.

SUBJECT TEACHER

Your current S5 teachers will be able to tell you whether you have a realistic chance of success if you take that subject to a more advanced level. Ask them!

If you are thinking of starting a new subject or “crash” subject, be sure that you really understand what will be involved – how much practical work, how much written work, how much homework, what work you might need to catch up in your own time – the best person to ask is the principal teacher of that department.

CAREERS INTERVIEW

Any pupil in the school can request an appointment with the Careers Officer at any time. A self-referral system is in operation – please speak to your pupil support teacher if you wish to request an interview.

VOCATIONAL PROGRAMME

East Renfrewshire Council and Williamwood High School have developed a very successful vocational programme providing young people with the opportunity to achieve qualifications and a progression route that fits them best, and that will serve their interests, talents and ambition.

Pupils interested in college based options should see their pupil support teachers to find out more about the college-based options. This will not commit pupils to a course but will give them, and their parents, the opportunity to consider the courses available so they may make a relevant and appropriate choice. On the school option form there is a box to tick if pupils are interested in work-related courses. Pupils who tick this box will be given the opportunity to find out more about the specific courses on offer as further details become available. In the meantime, you may wish to contact Miss Kirsty Milne (Principal Teacher of Pupil Support) who will be happy to discuss the vocational programme with you and answer any questions you may have.

FOUNDATION APPRENTICESHIP

Foundation Apprenticeships are a work-based learning opportunity for high school pupils in S5 Pupils for 2 Year Model /S6 for Shorter Duration Delivery Model. Pupils will spend time out of school at college or with a local employer, and complete the Foundation Apprenticeship alongside their other subjects. The qualification has two delivery models, the two year delivery model and the shorter duration delivery model (one academic year) and is linked to one of six key sectors of the Scottish economy, so young people are getting industry experience which will help them kick-start a successful career in their chosen field.

Please note: this option will be considered 2 of your S6 subjects and you will travel independently by bus or train – travel tickets should be kept as you will be reimbursed.

Pupils interested in Foundation Apprenticeships can obtain more information from their pupil support teacher. You may wish to source a work placement yourself. This would need to be health and safety checked by Gateway Service.
