

Directions for Getting to School

Through practical activities which include the use of technology, I have developed my understanding of the link between compass points and angles and can describe, follow and record directions, routes and journeys using appropriate vocabulary. MTH 2-17c

Can you give Charlie directions from his home to his school? Use the points of the compass to help him.

Directions for Getting to School

Answers

Can you give Charlie directions from his home to his school? Use the points of the compass to help him.

Multiple routes are available. For example:

Go straight ahead heading east.

Take the first turn heading north.

Continue north and take the second turn to head east.

Continue east and take the last turn to head north.

The School is the second building on the east side of the road.
