

Measure It!

Amazing Fact

The tallest tree in the world is a coast redwood called 'Hyperion', located in Northern California. It was only discovered in 2006 and measures over 115 metres tall!

Challenge

Look around the room you are in and estimate how tall or long something is, then measure it with your metre stick. Do your estimates get more accurate with each attempt?

Object or area	My Estimate	Actual Length

Now write a conclusion about what has surprised you or that you have found interesting about your investigation.

Conclusion:

You could also try to find out:

- why the location of it is kept secret;
- why the giant redwood grows so tall;
- about the trees you can drive your car through;
- whether there have been any taller trees in the history of Earth.
