To divide by 7, we divide the number into 7 equal groups and look at how many are in one group.

$$14 \div 7 =$$

Divide 14 into 7 equal groups.

Count how many there are in one group.

$$14 \div 7 = \underline{2}$$

Complete the calculation.

①  $35 \div 7 = \underline{5}$       ②  $63 \div 7 = \underline{9}$       ③  $84 \div 7 = \underline{12}$

④  $49 \div 7 = \underline{7}$       ⑤  $7 \div 7 = \underline{1}$

Find the missing number in the calculation.

⑥  $\underline{77} \div 7 = 11$       ⑦  $\underline{21} \div 7 = 3$       ⑧  $\underline{70} \div 7 = 10$

⑨  $\underline{48} \div 7 = 8$

Challenge: There are some rocks at the beach.  
Each rock has 7 starfish attached to it.  
There are 35 starfish in total. How many rocks are there?

Name: \_\_\_\_\_ Class: \_\_\_\_\_

Complete the calculation.

①  $14 \div 7 = \underline{2}$       ②  $42 \div 7 = \underline{6}$       ③  $35 \div 7 = \underline{5}$

④  $49 \div 7 = \underline{7}$       ⑤  $77 \div 7 = \underline{11}$       ⑥  $84 \div 7 = \underline{12}$

Find the missing number in the calculation.

⑦  $\underline{70} \div 7 = 10$       ⑧  $\underline{42} \div 7 = 6$       ⑨  $\underline{24} \div 7 = 4$

⑩  $\underline{84} \div 7 = 12$       ⑪  $\underline{63} \div 7 = 9$       ⑫  $\underline{7} \div 7 = 1$

⑬  $\underline{56} \div 7 = 8$

Challenge: There are palm trees growing on the island.  
On each palm tree there are 7 coconuts.  
There are 63 coconuts in total. How many trees are growing on the island?  
Write the matching number sentence.
