## Optional Extras!

Why not try these if you would like a little extra practice?

Create a calculation (in the squared area) for each problem to show how you worked it out. Be careful with those decimal points though!

- a. Alfie bought a sharpener for £1.78 and a packet of pencils for £2.99.  
How much did he spend altogether?

- b. Alfie paid with a £5 note.  
How much change did he get?  
*(Hint: When you create your calculation, it might help to write £5 as £5.00 !)*
