## Optional Extras!

Why not try these if you would like a little extra practice? Create a calculation (in the squared area) for each problem to show how you worked it out.
a. Alfie bought a sharpener for $£ 1.78$ and a packet of pencils for $£ 2.99$.
How much did he spend altogether?
b. Alfie paid with a $£ 5$ note.

How much change did he get?
(Hint: When you create your calculation, it might help to write £5 with a decimal point!)
