## Optional Extras!

Why not try these if you would like a little extra practice? Create a calculation (in the squared area) for each problem to show how you worked it out. Remember to put the decimal points in the right places!
a. Alfie bought a sharpener for $£ 1.72$ and a packet of pencils for £2.99.
How much did he spend altogether?
b. Alfie went out the next day with a $£ 20$ note.

He spent $£ 13$.
How much money did he have left?
