Searching the Web Safely

Lots of websites are safe to use, but some of them are <u>not</u> safe. What would you do if you saw something on a website that upset you? Visit this webpage to find out about some of the things you could do. When you have done that, you will be ready to try the wordsearch!

Clues

1. Always ask an adult that you t_____ before you search the web.

2. You could even ask that person to s_____ with you.

3. Some websites might have pictures or words that make you feel worried or s _____ .

4. If you see something that upsets you, press the m_____ button to make it go away.

5. On a phone or tablet, you could press the h_____ button or icon to get away from nasty things.

6. Remember to tell an a_____ what has happened right away.

Safer Search Engines

A **search engine** is something that helps you search for the information you need on the web. Some search engines are created especially to help keep children safe. *Swiggle* is one of these safer search engines. You can find it here: https://swiggle.org.uk/

Swiggle Challenge

- Find the *Swiggle* search engine.
- Use it to search for information about the place you would most like to visit in the whole wide world. (It doesn't even have to be on Planet Earth!)
- Post the name of your place and three of the most interesting facts about it that you found by searching with *Swiggle*.
