### Science- What are the parts and function of a plant?

In this lesson, we will identify the flowering parts of a plant and learn about their functions.

We are going to be following a series of lessons about plants from Oak National Academy. The link will take you to the third lesson in a series of five lessons about plants. Watch the tutorial on the video and complete the written activity from the video on a piece of lined paper or in your science jotter.

### Health and Wellbeing- Bounce Back

#### Keep things in perspective

Listen to the story *Did I Ever Tell You How Lucky You Are?* On YouTube

<https://www.youtube.com/watch?v=Et6EorgRHkk>

Discussion with an adult-

Explain that a person's perspective is their way of looking and thinking about something. Keeping things in perspective means keeping things in balance, and understanding that if one bad thing happens in their life, it does not mean that everything else in their life is spoiled. They may have a problem with a friend, but their family life is still fine, their pets are still terrific, their school work is still good and their football team is still playing well. Bad times are like a few threads in a jumper that have come loose. But the whole jumper hasn't fallen apart.

Work with an adult or sibling-

Find as many small words as possible in the big word '**perspective**'

Activity (Optional)- Make a poster that communicates the saying 'Don't sweat the small stuff!'

### Skills to develop this week

Help to empty the bins around the house. Remember to always wash your hands after handling rubbish bins.
