## Fossil Fuels

| Fossil fuels are made from <b>p</b> and <b>a</b>        |  |  |  |  |  |  |
|---|--|--|--|--|--|--|
| that died millions of years ago. They became            |  |  |  |  |  |  |
| <b>b</b> and eventually turned into fossil fuels.       |  |  |  |  |  |  |
| Example of fossil fuels are <b>c</b> , natural gas and  |  |  |  |  |  |  |
| <u>o</u>  |  |  |  |  |  |  |
| Coal is used for all sorts of things including          |  |  |  |  |  |  |
| m, tar for roads and dyes. It is also used to           |  |  |  |  |  |  |
| make <b>e</b> Electricity is made by burning the        |  |  |  |  |  |  |
| coal to heat water, which makes <b>s</b> , which        |  |  |  |  |  |  |
| turns a turbine.  |  |  |  |  |  |  |
| When Gas is burned it gives off h It is used to         |  |  |  |  |  |  |
| cook food and to heat houses and offices.               |  |  |  |  |  |  |
| Oil can also be burned to give off heat, and can be     |  |  |  |  |  |  |
| turned into <b>p</b> to run cars. It can also be turned |  |  |  |  |  |  |
| into <b>p</b> , paints and even <b>c</b>                |  |  |  |  |  |  |
| Fossil fuels are running <b>o</b> though, and when they |  |  |  |  |  |  |
| are burned they create <b>p</b> . This is why           |  |  |  |  |  |  |
| scientists are looking into other options that do not   |  |  |  |  |  |  |
| have the same problems.                                 |  |  |  |  |  |  |
