Activity Sheet

Answer the questions, by converting the units of time.
1 It takes Klara 9 hours and 24 minutes to design a new part for the engine on the spacecraft.

How long is this in minutes?
564 minutes

2 It takes Manu 6 hours and 47 minutes to plan the journey into space.

How long is this in minutes?
407 minutes
(3) The instruments in the spacecraft stopped working.
It took Stig 4 hours and 13 minutes to fix them.
How long is this in minutes?
253 minutes

4 The satellite takes 8 minutes and 19 seconds to be attached to the spacecraft.

How many seconds does this take?
5 It takes 16 minutes and 29 seconds to make sure the satellite is working correctly.

How many seconds does this take?
989 seconds

6 It takes 8 minutes and 28 seconds to load the spacecraft with food packages for the journey.

How many seconds does this take?
(7) It takes 3 days and 11 hours to load the oxygen tanks.

How many hours does this take?
83 hours

8 The telescope lenses need replacing.
It takes 2 days and 13 hours to replace them all.
How many hours does it take?
61 hours

Activity Sheet

9 It takes Manu 4 days and 17 hours to load the storage units.

How many hours does it take?

## 113 hours

60 days

46 days

The next flight is due to take place in 12 weeks and 7 days.

How long is that in days?

## 91 days

## 9 weeks and 4 days

10 weeks and 4 days

6 week and 1 day

Name: Class:

Draw the correct time on the clocks.

Solve the following word problems.
19 The engineers came to service the engines.
They started at 10:05am and it took them 4 hours and 15 minutes.
What time did they finish?
2:20pm
255 minutes
20
The planning meeting started at 6:30am and lasted for 3 hours and 45 minutes.
What time did it end?
How long is this in minutes?

Manu and Sten went home at 7:00pm.
They came back 12 hours and 30 minutes later.
What time did they arrive back?

7:30am

How long is this in minutes?
