Try to make the tall letters touch the top line and all the other letters should be the same size and keep your writing on the line.</p>

Science- To explain how a plant transports water

In this lesson, we will learning how plants transport water internally and watch this in an experiment.

We are going to be following a series of lessons about plants from Oak National Academy. The link will take you to the fifth lesson in a series of six lessons about plants. Watch the tutorial on the video and complete the written activity from the video on a piece of lined/blank paper or in your science jotter. There is a short quiz afterwards to test your knowledge.

Optional Activities

Choose another of the 'End of the Year' bingo activities to complete. The most important thing is to have fun doing it, as this is your last week of Primary 4!

Skills to develop this week

Do some decluttering! Sort through your old books and toys and decide which ones you don't need anymore. Ask your adult for some boxes to put them in so they can be safely stored until they can be taken away
