

Information Handling Outdoors

Complete a survey of your outdoor area. Look for items such as leaves, weeds, sticks, stones. You can choose your own items to create your list.

Record the results in a similar way as in the photo below. Remember that tally marks are grouped in 5s.

You could also create your own bar chart like the one below. You don't need to use leaves – this is just an example. You can be as creative as you like. 😊
