

Taste

Tongue map

- Can you taste different tastes on different areas of the tongue or all tastes everywhere?
- Are some areas of the tongue more sensitive to some tastes or all tastes?

Mark where you can taste

sweet, salty, sour and bitter

tastes on the diagram of the tongue below:

Ask a helper to put some different smells into cups or jars for you to guess what they are (you might need to close your eyes or wear a blindfold).

Some suggestions are: chocolate, mint, spices, cut grass, citrus fruits, coffee etc.

Smell

What can you smell?

What can you feel? Can you describe different textures?
