

# Password Problem

The most commonly used password and therefore the easiest to hack is 123456.

Try this maths problem involving the numbers 1, 2, 3, 4, 5, 6.

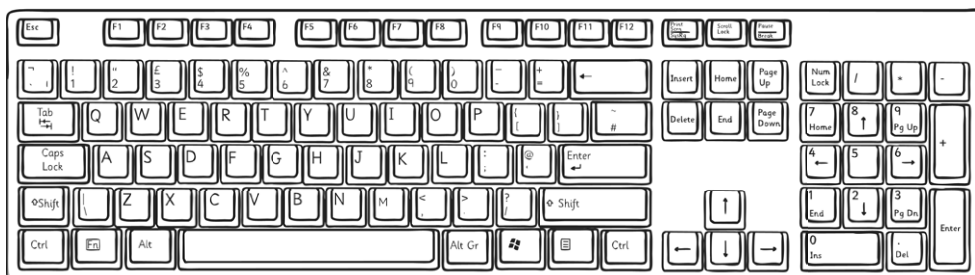

Use each of the numbers 1 to 6 once. Write one in each square.

Note: Numbers next to each other must not be joined. For example, 3 must not be joined to 2 or 4.

You could also try to find out:

- how many passwords the average person has;
- how to make and remember a safe password;
- about the biggest cases of hacking in computer history.
