

Introduction

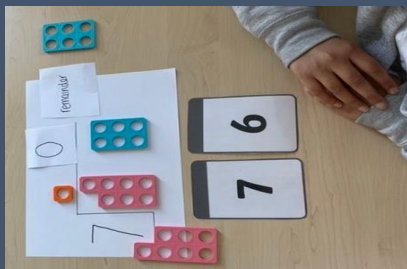

Welcome to our Primary 6 newsletter for November 2020. We have had a fantastic few months together and I continue to be blown away by the enthusiasm and personal commitment demonstrated by your children. You have lots to be proud of! This newsletter should hopefully offer a snapshot of life in P6 and some of the experiences we have enjoyed together.

Mr Milligan

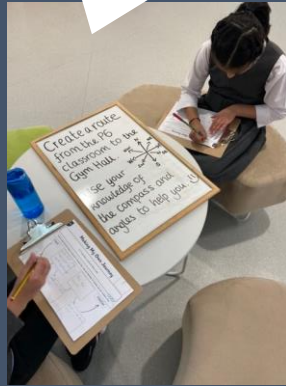

Maths

Maths has been my favourite subject because I have enjoyed learning new things and playing countdown.
Abdullah

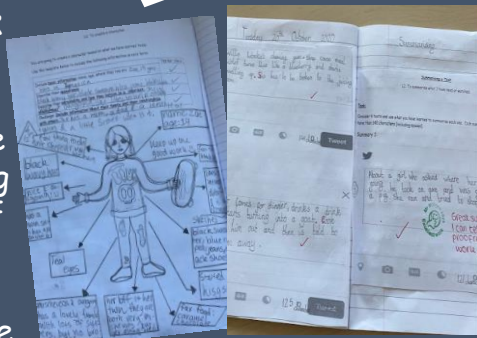

In maths, we use concrete materials to deepen our knowledge of mathematical processes. We have loved doing lots of practical maths tasks to ensure we apply our maths knowledge to real life problem solving contexts. Maths games are much loved in P6 - our firm favourite is Speed Multiplication!

I like writing because I have been able to use my own ideas to create stories.
Emmé

Literacy

In literacy, we have recently finished a creative writing block where P6 produced a wealth of engaging, imaginative texts. We are currently focusing on the reading skill of summarising and have enjoyed applying our skills to texts we have read and watched.

STEAM

P6 have produced some fantastic models and designs during STEAM learning experiences. They have developed their knowledge of design and engineering principles, using what they have learned to improve their designs. Recent activities include designing a rollercoaster model with spaghetti and creating cardboard boats to float with a weight.

I love building models and creating ways to solve problems.
Blake

PE

When taking part in PE, P6 have worked hard to improve their fitness across a range of experiences (and in a range of weathers). They successfully led activities for Maths Olympics: a testament to their personal commitment and maturity.

I have enjoyed trying new games and being outdoors for PE.
Cole

Useful information

PE days - Wednesday and Friday.
