What Learning Looks Like in Our Classroom

We have just established a new 30 minute literacy programme called Daily Literacy Learning (DLL). This is a structured experience that children will engage with to support developing reading and writing fluency - I'm sure you will have heard all about it! After DLL, the children have the opportunity to engage with different play experiences and activities in the classroom and in the atrium, including completing their 'targets'.

Primary 2bravo continue to focus on our health and wellbeing through engaging in physical education on Tuesdays, Thursdays and Fridays. When engaging with other curricular areas we make sure we are always getting the opportunity to apply our literacy, numeracy or health and wellbeing skills across learning during this period of recovery.

Maths Week Scotland

During Maths Week Scotland in Primary 2, we focused on odd and even numbers. There were many activities which involved sorting and creating odd and even numbers within 10 and beyond!

Glow

In Primary 2bravo, we are developing our independence with digital technologies. To aid this, children must know their username and password to access the devices in class. Please ensure that your child knows their password and has a copy in their bag. Thank you.

Literacy

With reading, we have been developing our summarising skills by identifying the main idea of a text and sequencing what we have read and/or listened to in the correct order.

In writing, we have been developing our letter formation with daily handwriting and have focused on presenting our work neatly.

To develop our knowledge of phonics and improve our reading, we do various active spelling activities throughout the week.

Maths

Primary 2bravo have been working hard to add and subtract numbers within 20 and have begun to work on recognising how to make numbers within 100.

We have been practising different ways to make a number through various play experiences.

Last term we were able to identify, label, describing and sort 2D shapes and 3D objects and are now beginning to apply this through patterns and symmetry.

Physical Education

So far this year we've been working on team work and coordination. We started off looking at various invasion games where children had to work as a team to complete the tasks given to them.

We've also been developing our gross motor skills; practising throwing and catching a variety of small and big objects with a partner and have started to learn about tennis.
