Python Debugging: Lab

Section 21.14

Completed

< back to module

This lab is provided in the [Essentials VM](#), which you can [download and learn how to setup on this page](#).

The script located at ~/Labs/Programming_1 in the is designed to perform basic mathematical operations on random integers, however the developer has made a few mistakes when writing this code so it doesn't run properly.

Examine the script and attempt to fix it using what you have learned thus far.
