# Python Debugging: Lab

Section 22.11

Completed

< back to module

This lab is provided in the [Essentials VM](#), which you can [download and learn how to setup on this page](#).

There is a script located in the Essentials VM at ~/Labs/Programming\_2 which is designed to let you play rock paper scissors. However, the developer has made a few mistakes when writing this code so it doesn't currently run properly.

Go through the script and, using what you've learned so far, try to fix the script.
