GRADUATE LEVEL APPRENTICESHIP

Software Development for Business

Eureka Solutions is a software company operating in the general area of business systems -this covers accounts systems, Enterprise Resource Planning (ERP systems), Customer relationship management (CRM) Systems - generally the common systems that most business use. Some local customers are Goals Soccer, VG Energy, Barrhead Travel and many more - all them require different types of systems to run their business - as a software company we can customise the system to meet their exact needs.

To do this we need to employ staff with a variety of skill sets:

✓ **Software developers**
   Mainly Graduates

✓ **Accountancy Skills**
   Accounts qualified staff who understand debits, credits, balance sheets

✓ **Mathematics/Business Studies**
   Staff who understand data analysis and can create the reports customers need

✓ **Project Managers**
   We run some big projects and these need organisational skills to be successful

Once we have the skill set we train our staff in various types of role e.g.

✓ **Support Staff**
   Solving client problems over the phone
   Accounts/data analysis and problem solving skills needed

✓ **Sales/Account Management**
   People with technical skills to understand customer problems
   They also have people skills to build relationships with our customers

✓ **Implementation Team**
   Going on customer sites and setting up and testing the system

✓ **Project managers**
   Designing and managing project for customers

✓ **Programmers**
   Ensuring the client gets exactly what they need
   Developing our own software for sale throughout the world

We currently have 50+ employees - half of whom started as graduates with us who we have trained and developed from junior staff to becoming members of our leadership team. With the creation of the new Graduate level Apprenticeships we are keen to create an opportunity for an appropriately qualified school leaver to join us in a journey towards a supported degree and earn a salary while doing so - the degree will be B.Sc.(Hons) Software Development for Business at Glasgow Caledonian University (GCU).

The degree is carried out by attendance at University on a part time basis and paid employment at Eureka Solutions over four years. Full details are available on the Universities leaflet -available at our open evening.

You need to have the relevant entrance qualifications for University -BBBC- at least one of which is Mathematics, Physics or Computing. You will be paid a salary of between £12k and £24k during your studies - salary will rise with experience and ability to contribute to the work of the software development team. Expectations will be high and this is NOT the easy option towards a degree - you are working and studying.

Applications via a CV outlining your current studies and explaining why Modern Apprenticeship is for you - send to **vacancies@eurekasolutions.co.uk**

MODERN APPRENTICESHIP

Accountancy - Business Administration

Eureka Solutions is a software company operating in the general area of business systems -this covers accounts systems, Enterprise Resource Planning (ERP systems), Customer relationship management (CRM) Systems - generally the common systems that most business use. Some local customers are Goals Soccer, VG Energy, Barrhead Travel and many more - all them require different types of systems to run their business - as a software company we can customise the system to meet their exact needs.

To do this we need to employ staff with a variety of skill sets:

✓ **Software developers**
  Mainly Graduates

✓ **Accountancy Skills**
  Accounts qualified staff who understand debits, credits, balance sheets

✓ **Mathematics/Business Studies**
  Staff who understand data analysis and can create the reports customers need

✓ **Project Managers**
  We run some big projects and these need organisational skills to be successful

Once we have the skill set we train our staff in various types of role e.g.

✓ **Support Staff**
  Solving client problems over the phone
  Accounts/data analysis and problem solving skills needed

✓ **Sales/Account Management**
  People with technical skills to understand customer problems
  They also have people skills to build relationships with our customers

✓ **Implementation Team**
  Going on customer sites and setting up and testing the system

✓ **Project managers**
  Designing and managing project for customers

✓ **Programmers**
  Ensuring the client gets exactly what they need
  Developing our own software for sale throughout the world

We currently have 50+ employees - half of whom started as graduates with us who we have trained and developed from junior staff to becoming members of our leadership team. We now want to expand our activity in developing Modern Apprenticeships in areas of Accountancy and Business administration.

For both of these positions you will start on basics and progressing to degree level qualifications will be possible - we currently have staff on this route working towards accounts qualifications with Chartered Institute of Management Accountants (CIMA). We are looking for well qualified candidates with 4 Highers one of which at least should be mathematics, Accounts or Business Studies. If you think you have the determination and can prove to us you are the right person we can be flexible on the qualifications - we would like qualifications - we need determination. Salary level will progress from £9,600 per annum to £24k when you become a useful member of the team - how long it takes is up to you.

Applications via a CV outlining your current studies and explaining why Modern Apprenticeship is for you - send to **vacancies@eurekasolutions.co.uk**

ABOUT EUREKA SOLUTIONS

Eureka Solutions is an award-winning provider of business management software and are the forefront of changing technology with a focus on Cloud in the world of ERP business systems - the systems that run every successful business. Our core products are from leading software vendors NetSuite & Sage. Along with this, Eureka Solutions are also a renowned developer of apps & bespoke software solutions.

Since its creation, Eureka Solutions has grown from 3 members of staff, to 50+ today and is continuing to grow still. With a combination of graduates, qualified accountants, accredited staff, and apprentices with skills to provide the right solution and support to suit any business' needs.
Eureka Solutions was established with the aim of becoming both a leading partner and a leading developer of software solutions for businesses and with many years' experience, we can proudly say we have achieved what we set out to and continue to maintain these standards and strive for further success.

MODERN APPRENTICES AT EUREKA SOLUTIONS

Jaclyn McDonald

I joined Eureka Solutions in September 2013 undertaking a modern apprenticeship in the Support team. A modern apprenticeship where I could learn on the job and gain valuable hands on experience of being in a working environment whilst studying towards a qualification was definitely appealing to me.

Becoming an apprentice with Eureka Solutions was a great idea. There are so many opportunities with training and in house learning and it gives you determination to make yourself better.

I'm studying towards a CIMA qualification with the Chartered Institute of Management Accountants.

Nathan Ive

I joined Eureka Solutions as a Digital Marketing Apprentice in May 2015 after completing my 6th year at Williamwood High School.

I was keen to get involved straight away and gain experience in a working environment, while aiming towards a final qualification and continuously growing my knowledge. Eureka Solutions avidly encourage growth and learning for employees and I have never been without the support or encouragement I need to enhance my abilities.

I'm studying towards a certificate in Digital Essentials with the Chartered Institute of Marketing.

Jonathan Cassidy

I joined Eureka Solutions in September 2014, becoming a modern apprentice in the Support team and I'm currently in the process of transitioning into the implementation team.

When the opportunity to apply for Eureka Solutions came along, it was the perfect opportunity for me to gain experience in an industry I was keen to work in.

Alongside my work, I'm currently studying towards a CIMA qualification with the Chartered Institute of Management Accountants.
