

Online Learning Resources – Mental Health

NHSGGC Mental Health Improvement Team

During these unprecedented times the capacity to have face to face training is minimal. It is with this in mind we the NHS Greater Glasgow and Clyde Mental Health Improvement Team have collated a range of free online learning opportunities relating to Mental Health. We have laid these out in a life course approach. This list is not an endorsement but rather a snapshot of learning resources that are out there. The training we will be highlighting will be in general at the informed and skilled levels of the Mental Health Improvement and Suicide Prevention Framework and the Perinatal Mental Health Curricular Framework (PNMH).

The PNMH curricular framework sets out the different levels of knowledge and skills required by members of the Scottish workforce, who have contact with mothers and their babies, so they can support mothers, babies and their families to have positive well-being and good mental health during the perinatal period and to intervene in a timely and helpful way when mental ill-health is present. Please map any training required the appropriate level for the staff undertaking any of this training. For more detail please see here: [PNMH Curricular Framework](#)

The Mental Health and Suicide Prevention Curricular Framework domains cover the promotion of good mental health, improving quality of life, tackling mental health inequalities, supporting people in distress or crisis, promoting resilience and recovery, preventing self-harm and suicide, and the knowledge and skills required across 4 levels of practice: informed, skilled, enhanced and specialist. For more detail see here: [Mental-health-improvement-and-suicide-prevention-framework](#)

The list of Mental Health awareness and training opportunities are by no means exhaustive and you may like to populate the grid with other online resources or topic areas to suit your needs. The courses have been chosen from Quality Assured providers and are free. Online learning can be very useful but should never replace face to face training in its entirety as there is a richness, value and experience that participants can bring to training.

Prepared by Heather Sloan, Health Improvement Lead (Mental Health) on behalf of NHSGGC Mental Health Improvement Team, updated 29th July 2020

Need help with a mental health problem?

Please ensure that you consider your own wellbeing in undertaking any learning in the mental health sphere and be prepared to draw on available support systems, such as staff wellbeing resources, should the need arise.

If you need help with a mental health problem or need emotional support please contact one of the helplines below, visit your GP surgery or call NHS 24: **111** (24 hours, every day)

Samaritans are available 24 hours a day, 7 days a week on 116 123. Your call will be confidential and will be taken by a trained Samaritans volunteer. Alternatively you can email jo@samaritans.org

Breathing Space is available between 6pm and 2am any day of the week on 0800 83 85 87 (calls are free of charge). Your call will be taken by an employed mental health advisor.

SHOUT Text SHOUT to 85258

For support in a crisis, free on all major phone networks. Text service. <https://www.giveusashout.org/>

Childline is a free 24-hour helpline where children and young people can talk to a counsellor about any problem.

Phone: 0800 1111 www.childline.org.uk

For those experiencing serious distress; <https://stayingssafe.net/>

If you live in the Glasgow or Renfrewshire area contact Lifelink on 0141 554 4434 or <https://www.lifelink.org.uk/>

If you are feeling suicidal, please tell someone who will take you seriously and be able to help and do this as soon as possible. Tell a family member, friend, colleague, health professional or call one of the helplines above.

If you think you need an emergency ambulance you should dial 999.

Infant and Maternal Health	Course Descriptor	Provider	Cost / other info
