

August in Primary 1 Our Learning Journey

The month of August has come and gone and the pupils Primary 1 have settled into school, our classes and their new routine very well! We have been improving our fine motor skills by using play-doh, threading and mark making. In the creative area we have been learning how to cut safely. In the Social area we have been creating our narratives through role-play and small world resources. In the Discovery area we have been investigating capacity using sand and water. We have been learning our sounds and exploring how to blend these to make and read words. We have also been learning to recognise tricky words to help us with our reading. In Numeracy, we have been using Numicon to learn about numbers and practise counting forwards and backwards to 20.
