

# September/October in Primary 1 Our Learning Journey

The months of September and October have been full of exciting learning experiences in Primary 1. We have continued to develop our gross motor skills, exploring how to move our bodies well, how to manage and control them and finding out how to use and share space. Our fine motor skills and pencil grips are improving as we practise our letter and number formation. We are exploring numbers, understanding that they represent quantities, and we can use them to count, create sequences and describe order. We continue to learn new sounds and are learning our sounds and building our confidence in making and decoding words. In September we welcomed family members into our P1 base to enjoy a stay and play morning. We also raised money during our schools dance-a-thon with Miss Gray teaching us some new moves. We saw out October with our spooky and fantastic Halloween Party.
