

Our Learning Journey in November and December

November and December have been very busy months in Primary 1. During this time we have continued to work on our phonics skills, introducing consonant and vowel digraphs. We have been applying these skills to help us decode our words in reading and writing. We visited the library and enjoyed our book bug session. We have loved reading the books we were given. In Numeracy we have studied time, days of the week, months, seasons, o'clock and data handling. In the Discovery Room we have been making 3D models. The Ninja Challenge was so exciting, what a fun way to develop our motor skills. Celebrating health and well-being month, Dr Hendrie visited our Primary 1 hospital, teaching us how to call for help and manage an emergency situation. We also enjoyed Move It Monday and a yoga session with Mrs Galffy. During December we have transformed our classes into winter wonderlands, helping us develop our vocabulary and storytelling. We enjoyed learning about the Christmas story as we role played with the Travelling Nativity. As Confident Individuals we practised and performed our Christmas Story. What a busy couple of months!
