

February/March in Primary 1 Our Learning Journey

The month of February and March have presented us with many new and interesting learning opportunities. During this time we have been investigating the first signs of Spring, including a scavenger hunt. We have been using our senses to explore the different temperatures that come on days of snow, ice and sun. We are beginning to discover the change that happens with living things in our environment. We have continued to look at life beyond land with a focus on creatures that live in the oceans. On our Journey towards Easter we have all made Lenten Promises, been learning new prayers and trying to follow the example of Jesus by being kind, helpful and loving. Within Numeracy, along side our addition and subtraction work, we have been looking at measure and collecting and interpreting data. In Literacy we have introduced online books through the Big Cat readers. These books afford the children an excellent opportunity to apply their phonics skills.
