

P2B FEBRUARY 2023

Life Beyond Land

We will be finishing our Life Beyond Land topic at the end of this term. We have recently looked at life beneath us and under the water too. We did some research on jellyfish and learned lots about other sea creatures too. We look forward to creating our class expedition video to share with parents on Seesaw.

Literacy

We wrote a fantastic Pancake recipe for Pancake day! We have enjoyed making our library super cosy this term, adding in lots of new books and exploring different texts. We have also been learning a little Bit about Origami and have written and followed simple instructions to make excellent creations.

Maths & Numeracy

We have been working on recognizing coins and notes and calculating change. Now, we look ahead to new topics such as Measurement, Fractions as well as continuing with our Number Talk strategies and working on addition, subtraction to 20 and beyond as well as numbers to 100. We are super excited for STEM week and have lots of Mathematical challenges in mind!

RERC

We received our Ashes on Ash Wednesday and virtually watched the lovely mass at St. Cadoc's Parish. We have been talking about what we will give up or do more of for Lent and have agreed our Lenten promises. We have a quiet prayer corner in the classroom where we can go when or if we want to spend some quiet time speaking to God.
