

UK CADETS

Anglo-Eastern (UK) Ltd is currently seeking our next generation of officers. We offer an excellent cadet development programme for UK residents, with three distinct streams tailored to suit the needs of our cadets and clients, and are currently looking for new recruits to commence training in September 2022.

THREE STREAMS, THREE CAREER PATHS

Deck Officer Trainee

Deck officers work primarily on the bridge of the ship to ensure the safe navigation of the vessel. In port, deck officers ensure the safe loading and unloading of the vessel. As a deck cadet, you will learn how to maintain the vessel, look after and inspect the life-saving and firefighting equipment, as well as navigation. Deck officers can progress through the ranks to Master.

Engine Officer Trainee

Engine officers work primarily below deck to ensure the safe and efficient running of the vessel's engines and machinery. On a daily basis, engineers will be involved in the preventative and proactive maintenance of machinery, such as engines, generators, and fuel, water and ventilation systems. Engine officers can progress through the ranks to Chief Engineer.

Trainee Electro-technical Officer

Electro-technical officers (ETOs) specialise in marine electronics. With advancing technologies, onboard electronics are becoming increasingly more complex and require highly skilled individuals to look after them. ETOs maintain and repair any equipment with an electrical

component, from the computers monitoring the engine room to the radars and communication equipment on the bridge. ETOs can progress to Senior ETOs.

BENEFITS

Cadets are provided with a monthly training allowance, and where applicable, a monthly college accommodation allowance (sponsor specific).

In addition, we cover the following expenses for our cadets:

- Course and examination fees
- Documentation/uniform/vaccination costs
- Cost of travel to and from the vessel
- Cost of travel to and from college at the start and end of each term

APPLY NOW

This cadet development programme is only open to UK residents. To apply, complete the application form on our offshore site at www.angloeasternoffshore.com/cadets
