Strategies to help with Anxiety:

Research has shown that children who experience problematic anxiety can be successfully taught how to cope better with it. Research indicates that the most effective treatment for anxiety disorders is Cognitive Behavioural Therapy (CBT). CBT aims to teach children how to face their anxieties and how to think about situations in a different way so they are able to better manage their anxiety. Cognitive Behaviour Therapy consists of: Learning about anxiety and what causes it (psycho education) Learning relaxation skills Realistic thinking (cognitive exposure) Problem solving Gradually facing the fear/anxiety (graded exposure) Child anxiety management strategies (taught to parents)

Diploma Completion for S6 pupils – See the below instructions

- **Pupils go on to “Pupil Shared Area”**
- **Click on “PSHE”**
- **Pupils go on to “Diploma 2020”**
- **Pupils click on their own respective Alpha**
- **Click on the “S6 Diploma” and immediately save in the folder using their name.**
- **Pupils are to complete each section of the Diploma by writing in to the text box at the bottom of each section**
- **This will be a working document and pupils should save their work as they go**
- **It is important that when pupils are writing information in to the text box that they do not hit the return key as this will not work with the software when transferring on to the Diploma**
