

National 4

National 4 contains 3 units which are internally assessed:

- Expressions and Formulae
- Relationships
- Numeracy.

The added value unit addresses breadth and challenge through the use of mathematical ideas and strategies. The assessment of added value will be done through a test and include the use of numerical, algebraic, geometric, trigonometric, statistical and reasoning skills. In preparation for the added value test learners are given the opportunity to:

- analyse a range of real-life problems and situations involving mathematics
- select appropriate mathematical skills
- apply mathematical skills with and without the aid of a calculator
- determine solutions
- explain solutions and/or relate them to context.

Please note the Added value unit is not currently being assessed for session 22/23 due to COVID mitigations.
