

## Music Workshop

We were lucky enough to have a visit, in collaboration with An Lantair, from a group of very talented musicians who are visiting schools in Lewis and Harris. We were first treated to a small concert as a whole school, then our class was taken for a music workshop to write lyrics for a song (based on Harris) and for the musicians to learn the tune on their instruments. We performed our song at the end of the workshop, it was fantastic!

## Bikeability

L.M.S joined us for bikeability level 2 based around the streets and roads near school. We practiced our signalling for right and left turns, how we join a major road from a minor road and a minor road to a major road. We practiced passing parked cars and the rules of the road. Robbie and Keith from Cycling Scotland came from Glasgow to train us, with help from Jenna, our Active Schools Coordinator. Robbie and Keith were thrilled with the children's road awareness and cycling proficiency. Well Done everyone!

We have begun our new topic on Rainforests this week. We have been investigating the different types of plants that grow there and their differing heights. We began to compare them but realised quickly that using a metre stick was a very inefficient way to measure 50 metres!

We also made the most of the good weather playing rounders in our P.E. lessons. It was good team building listening to each other when we were fielding.
