Banana split game

- 1) The banana split game is where you have 5 characters.
- 2) You have to make sure the number add's up to 30p.
- 3) It's a money game.
- 4) The game is about bananas.

- 1) I think this is not a fair situation because I think the shop keeper should get the least money.
- 2) I think the 30p is shared it out as it is because the shop keeper own's the shop so she gets the most.
- 3) The person who has the power is the British Government cause they own all the shops.
- 4) I think they should give diferant amount of money.

5)
