

Daily What

Springfield Dishes The Dirt

On Monday 3rd November various Daily What reporters visited Springfield. The reporters wanted to find out the deep dark secrets of Springfield Community. The first question we asked the Springfield townsfolk was are there any rivalries? Farmer John 20 quoted "there is a bit of a rivalry between our family and the helipad house." One very interesting thing was that Farmer Jim 42 got paid £140 a week while Farmer John 20 got paid £100 a week. Also house number

2. quoted "We grow the best plant in the world nobody can beat us." At the moment they say BerryBlush is living up to her standards. A few houses keep animals and some grow crops to share between them all. One member of Springfield community said in this village we are all like one big family.

BerryBlush!!!

A lovely report on your visit to Springfield,
Super newspaper report layout.

Banana Split Game.

We learned about the 5 jobs and the process of how the bananas go from the Caribbean to shops and supermarkets. We then got our jobs and had to decide how much they should get paid. The real thing was quite surprising.

1. I do not think it's a fair situation because the Plantation Owner should get paid the most because without him there would be no field to grow the bananas.
2. The 30p is shared out as it is because the rich country is greedier and wants all the money well the poor country becomes even poorer.
3. The British Government has the power because they are richer than the poorer so they decide.
4. To improve the situation there should be a charity called the Farmers charity which all the money goes to poor farmers.
