Supporting the anxiety (intervention)

Supporting approach 'Relaxation'	Making it successful	Resources
Using relaxation techniques can be helpful for calming thoughts and tensions in the body caused by anxiety. Relaxation techniques are unlikely to cure the anxiety but will help to manage and control anxieties alongside other approaches being used. Some relaxation techniques involve relaxing your body and focusing your thoughts. Others involve engaging in activities that bring pleasure and distraction. Some relaxation techniques are: Breathing exercises Visualisation Progressive muscle relaxation Yoga/meditation Physical exercise Creative activities	 People need to try different relaxation techniques until they find the one or ones that work for them. It takes practise to find the one that suits you. Think about the environment that will make doing your relation technique successful. Relaxation techniques work best when combined with other approaches to manage and reduce anxiety and boost overall feelings of wellness physically and emotionally. Some popular activities that people think are relaxing, such as watching tv, playing a computer game or having specific foods or drinks do not assist the nervous system in the body to: Slow down heart rate; make breathing slower and deeper; reduce or stabilize blood pressure; increase blood flow to brain; relax muscles. Relaxation techniques can be used proactively to prevent anxiety levels increasing or used in response to anxiety rising. 	Tips and exercises to help you relax Relaxation exercises at home- guide for parents and carers https://blogs.glowscotland.org.uk/re/stfillans/fi% 20les/2018/05/Relax-Kids-Pack-for-Parents.pdf Relaxation scripts for children and more https://www.innerhealthstudio.com/relaxation- scripts-for-children.html

In positive psychology, *flow* is the mental state of operation in which a person performing an activity is completely absorbed and fully immersed in a feeling of energized focus, full involvement, and enjoyment in the process of the activity. *Mihaly Csikszentmihalyi*
