

PeachyKeen competition for Fife primary schools

PeachyKeen is the human energy company, based in Kirkcaldy, who designed and made the PeachyKeen Pod which is currently part of one of the exciting exhibits in MAC's latest exhibition 'The Kingdom of If – Art & Sustainability in Fife' (see image on right), organised by Fife Contemporary Art & Craft.

They would like to offer a fantastic opportunity to Fife primary schools to design some kind of useful device which has to be powered by a PeachyKeen Pod – no mains electricity allowed, just pedal power! They would like pupils to submit a design and the winning idea will be built by PeachyKeen.

- Children to design a purposeful device to be powered by a PeachyKeen Pod.
- The device will use the electricity created by the human powered PeachyKeen Pod.
- The actual device is completely open to the imagination.
- Winning design will be built by PeachyKeen in partnership with the respective school.
- Guidance criteria: Inventive, Healthy, Sustainable and good FUN.

If your school would like to take part, please fill in the details below.

The deadline for applying is Friday 29 March 2012

Name of school

Name of class **No of pupils applying**

Full postal address inc postcode

.....

Telephone number

Email address

Please attach this form to completed applications from your school. One application for each child to include:

- a drawing of some sort on A4 paper
- and written detail about what its purpose is and what kind of specifications are required in order to make it (PeachyKeen will work out the serious technical bits!). This can go onto a second piece of paper if needed.

And send to: FCA&C (Town Hall, Queen's Gardens, St Andrews, Fife, KY16 9TA, tel 01334 474640 / www.fcac.co.uk
