

## Homework – Pregnancy

1. What do we call the baby...

Just after fertilisation? \_\_\_\_\_.

Between 5 days and 8 weeks after fertilisation? \_\_\_\_\_

8-40 weeks after fertilisation? \_\_\_\_\_

2. Why are there only three days a month in which a woman can get pregnant?

3. Write down two ways in which humans reduce the chances of pregnancy (contraception). How do they work?

4. Complete the table below.

<b>Part</b>	<b>What it is for</b>
<b>Vas deferens</b>	
<b>Fallopian tube</b>	
<b>Cervix</b>	
<b>Testicles</b>	
<b>Vagina</b>	
<b>Ovaries</b>	
<b>Penis</b>	
<b>Prostate Gland</b>	
<b>Uterus/womb</b>	

6. Which do you think is the most important part of the human reproductive system? Why?
