

## “Cells and Reproduction” – Traffic Lights

How can we look at small things?

How can we make cells easier to see under a microscope?

How can we work out the total magnification of a microscope?

What is a cell?

What jobs can cells do?

What are the parts of a plant cell?

What are the parts of an animal cell?

What are the parts of a cell for?

What are the parts of a flower?

What are the parts of a flower for?

What is fertilisation?

How does fertilisation happen in flowers?

What is puberty?

What are the parts of the human male and female reproductive systems?

What is each part of the human reproductive system for?

How does fertilisation happen in humans?

Where does fertilisation happen in humans?

What do we call the baby during pregnancy?

How should a baby be born?

How can we prevent pregnancy?
