Fuels - Homework 1

A burner full of fuel was used to heat up a beaker of water. The temperature was measure every 10 seconds. The results are shown in the table below.

| Time (s) | Temperature (°C) |
|----------|------------------|
| 0 | 28 |
| 10 | 35 |
| 20 | 41 |
| 30 | 48 |
| 40 | 57 |
| 50 | 64 |
| 60 | 73 |
| 70 | 78 |
| 80 | 82 |
| 90 | 85 |
| 100 | 87 |
| 110 | 95 |
| 120 | 100 |
| 130 | 99 |
| 140 | 100 |

Use the graph paper below to draw a line graph of these results.

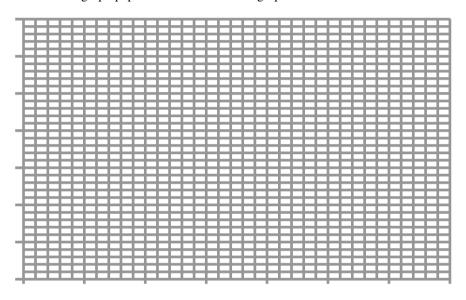

NB: Check your graph has axes, axis labels, units, scales, points and a "best fit" line!

Four fuels were used to heat up 4 beakers of water. They were allowed to heat for 2 minutes before a final temperature was measured in each beaker. The results are shown in the table below.

| Fuel | Final Temperature (°C) |
|----------|------------------------|
| Ethanol | 76 |
| Methanol | 45 |
| Petrol | 90 |
| Diesel | 50 |
| Octane | 85 |
| Methane | 70 |

Use the graph paper below to draw a bar graph of these results.

 $\ensuremath{\mathsf{NB}}\xspace$. Check your graph has axes, axis labels, units, a scale and bars.
