

Lab Equipment

- **You need to know about each of these pieces of lab equipment and how they're used...**
 - **Conical flask**
 - **Beaker**
 - **Measuring cylinder**
 - **Delivery tube**
 - **Dropper**
 - **Test tube/boiling tube**
 - **Evaporating basin**
 - **Pipette (with safety filler)**
 - **Burette**
 - **Volumetric (standard) flask**
 - **Funnel**
 - **Thermometer**

Experimental techniques

- You should be familiar with the following experimental techniques...
 - Filtration
 - Distillation
 - Use of a balance
 - Titration
 - Collecting and measuring a gas
 - Safe methods for heating
